The Aesthetics Registration Platform is a project that connects many areas with enormous potential: Medical Aesthetics, Big-Data, IoT and Innovation. Growth and development in each of these fields is important for the quality of our lives. But joined together into a new, disruptive model they have the power to make our planet a better place to live in.

Supporting this platform means supporting sustainability because it brings together technology, pharmaceuticals, clinics, doctors and patients with common interests: to create a valued platform, support and to create a smart future.

## Homepage

# Welcome to the Aesthetics Registration Platform!

The Aesthetics Registration Platform is an application that manages clinics, keep patient files and to capture Injectable treatments visually.

The platform has as highest entity a clinic. One or more doctors (assistants) are linked to a clinic. Patients are linked to a clinic and their doctor. Patients visits/treatments are linked to patients. Doses/injections are linked to visits/treatments.
